## Interfacing non-standard cameras to Matrox Genesis

PULNiX TM-6703

September 24, 1999

### Camera Interface Details

#### Mode 1 : Continuous

- **Frame rate:** Matrox Genesis receives the continuous video from the camera. The frame rate is listed below for each mode.
- **Exposure time:** Exposure time is inversely proportionate to the frame rate (no shutter) or determined by the shutter setting. Refer to the camera manual for more information.
- **Camera switch settings:** Refer to the camera manual for additional information. Switches for this mode should be set as follows

Mode 1: Continuous

Modes	Normal	Double scan	200 line scan	100 line scan
Hz / Frame rate	60 / 60fps	120 / 120fps	125 / 130fps	220 / 220fps

Switches	Settings	Settings	Settings	Settings
Shutter (Speed)	As desired	As desired	As desired	As desired
ASY / MAN	MAN	MAN	MAN	MAN
N / P	N	N	P	P
O / T	O	T	T	O

#### Mode 2 : Asynchronous reset (External pulse width control)

- Once it has received the external trigger signal, Matrox Genesis sends the EXPOSURE2 (VINIT) signal to the camera with a width equal to the desired exposure time (following a **delay of 286.2 ms (9H)** from the leading edge of the EXPOSURE2 (VINIT) signal).
- **Frame rate:** The frame rate is determined by the frequency of the external trigger signal.
- **Exposure time:** The active and inactive periods of the EXPOSURE2 (VINIT) signal is the exposure time. The default exposure time is listed below for each dcf. In order to change the width and deployment time of EXPOSURE2 (VINIT) use the Exposure Settings menu tab in Matrox Intellicam. Consult the Matrox Intellicam User Guide for more information.
- **Minimum / maximum exposure width:** minimum EXPOSURE2 (VINIT) pulse width is equal to **63.6ms (2H)**, while the maximum is equal to **15.9ms (500H)**.
- **Camera switch settings:** Refer to the camera manual for additional information. Switches for this mode should be set as follows

Mode 2: Asynchronous reset (External pulse width control)

Modes	Normal	Double scan	200 line scan	100 line scan
Hz	60	120	125	220
Default Exposure Time	1.79 ms	2.16 ms	1.73 ms	1.83 ms

Switches	Settings	Settings	Settings	Settings
Shutter (Speed)	9	9	9	9
ASY / MAN	ASY	ASY	ASY	ASY
N / P	N	N	P	P
O / T	O	T	T	O
